## Project Details

### Customer

Sintesi S.p.A., Brescia, Italy

### Project Type

Networking of individual car parks and bicycle renting stations

### Basic Data

9,000,000 vehicles per year

9,000 parking spaces

238 emergency call stations

176 integrated call points at entries/exits and automated pay stations

27 bicycle renting stations

19 car parks

### Technical Data

Intercom Servers GE 800, GE 700 and GE 200

Wallmount stations WS 210, EF 963, EF 862 and EF 562

Door and access control modules ET 661 and ER 661

ComWIN software

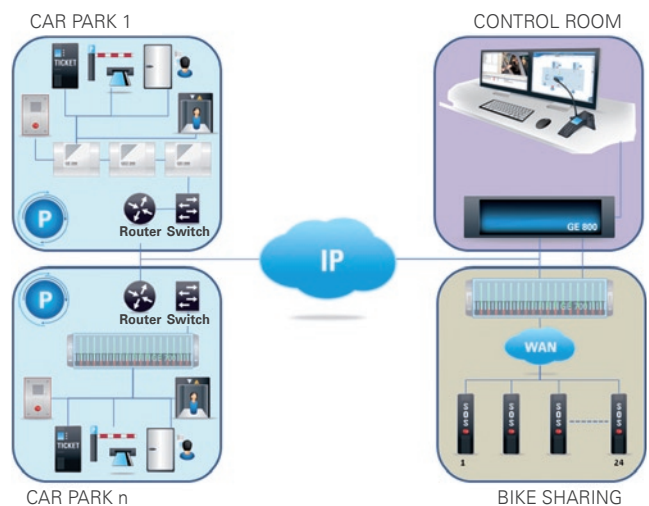

## The Solution

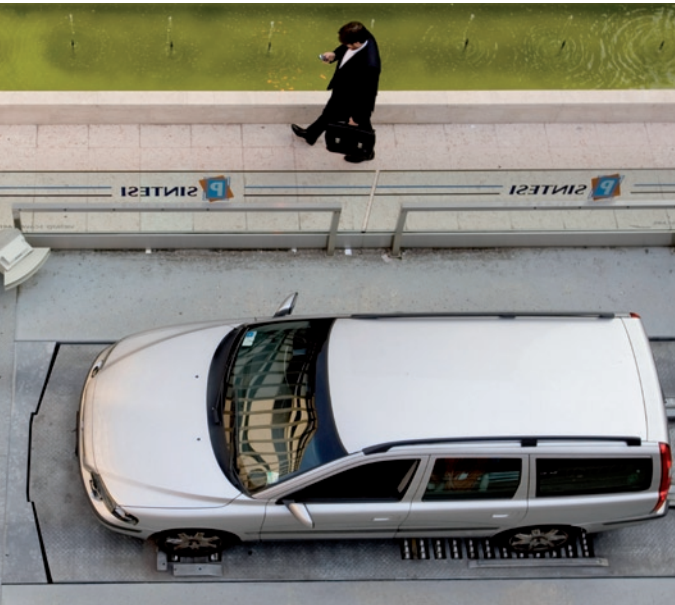

Every car park and bicycle renting station is equipped with a Comend Intercom system to ensure maximum security and service for parking customers.

The Comend system consists of 26 Intercom Servers (one GE 800, ten GE 700 and fifteen GE 200), which are installed across all parking facilities and the control room. All Intercom Servers are connected via TCP/IP network. The system works with analogue, digital and IP technology and interlinks the Intercom Servers via a TCP/IP network to allow full intercommunication throughout.

All communication and security links of the Intercom system are managed via the clean on-screen layout of the ComWIN control software.

### The solution of Sintesi S.p.A. at a glance:

## Short Profile of Sintesi S.p.A.

Sintesi S.p.A. specialises in car park management and construction. Sintesi currently manages more than 9,000 parking spaces in 19 car parks in the region around Brescia. Overall, the facilities provide parking space for an average 9 million vehicles per year.

At present, Sintesi has 55 staff members. To ensure easy, convenient control throughout, they have set up a monitoring room to manage and remote control all car parks and facility management systems, including CCTV, elevators, power panels, access control systems, and Intercom systems.

Sintesi also manages the city's bicycle renting system, which includes 27 renting stations (to be extended to 41 in the future), with a total of 290 bike racks. An extension of the service to the surrounding area outside Brescia is currently under consideration.

Sintesi is a part of the Brescia Mobilità S.p.A. holding group, which operates the underground system (in preparation) and manages traffic-related services for the city and surrounding suburbs, including public transport and other services, such as on-street parking facilities, traffic signalling and urban CCTV for the police force.

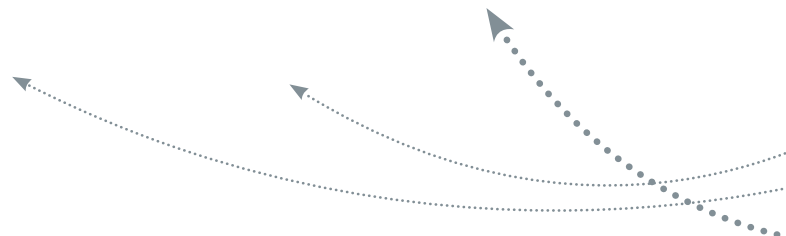

## Customer's Comment

Ing. Alberto Ragni  
Technical Department at  
Sintesi S.p.A.

"Several years ago we began looking for advanced and highly rated technology partners on the international market. We needed them to provide us with quality products and a reliable remote control system for our car parking facilities. We chose Commend for our Intercom communication systems because their system is extremely user-friendly, as well as quick to install and run.

We particularly appreciate the flexibility of the solution. It has turned out to be an excellent choice. All the features offered are crucial to a company like ours, as the handling and maintenance costs are virtually zero, while the benefit for the customers cannot be estimated high enough."

# Commend

## A Strong Network | Worldwide

When every second counts, people need a technology that does not just work, but is one hundred per cent reliable – anywhere, anytime around the clock. At Commend, we are aware of our responsibility. That is because millions of

people put their trust in us and our products every day. Whether at a London tube station, a car park in France or a hospital in the United States; because every word counts, everything speaks in favour of solutions by Commend.
